DEPARTMENT OF GENETICS  
Professor Joshua Lederberg

Dear Michael

I had mailed the enclosed column from Rome on my way home; but unfortunately it became entangled in some strikes there. At any rate it simply did not reach the Washington Post in time, and 'the moment' having past, it ~~will not be published as my regular series.~~ \*

However, please do pass it on to our friends at AfP, and make any use of it you may see fit.

If the Scientific Advisory Group to the W.I. Board is called to meet in the fall, I will make every effort to attend, and I hope Marguerite will also join me then.

Your hospitality was, as ever, the warmest and, again, my thanks.

Sincerely,

and please ask them to send add. copy
